SUMMARY

Organizational Change Management (OCM) professional with 5+ years of experience driving technology adoption, stakeholder engagement, and process modernization across Insurance, Healthcare, HRTech, and AI-driven environments. Proven track record of developing change management plans, communications materials, SOPs, training coordination, and governance documentation for large-scale, cross-functional initiatives. Skilled in stakeholder outreach, risk tracking, adoption barrier identification, and executive-level reporting. Experienced in Agile/Scrum delivery, ServiceNow workflows, and process improvement. Certified PMP and PSM-I with hands-on experience supporting enterprise digital transformation programs.

CORE COMPETENCIES

Change Management Planning • Stakeholder Engagement & Outreach • Communications Development • SOP & Process Documentation • Training Coordination & User Adoption • Risk Tracking & Mitigation • Web Governance Support • Intake Process Design • Operational Readiness • Executive Presentations • ServiceNow Workflows • Agile / Scrum Delivery • Power BI • Jira • Confluence

PROFESSIONAL EXPERIENCE

Cyberspace Technologies, Kansas City, Missouri

January 2025 - Present

Business Analyst

Client: Swiss Re Insurance

- Supported organizational change management activities related to operational workflow modernization, governance reporting, and SLA process improvements for a global P&C insurance stakeholder environment.
- Developed stakeholder engagement plans, executive-level communications, and readiness materials to drive adoption of new reporting frameworks and operational standards.
- Created and maintained SOP documentation, process flow diagrams, and governance materials to standardize workflows across cross-functional business operations teams.
- Built and maintained Power BI dashboards tracking operational KPIs, SLA performance, and ticket metrics—enabling leadership to monitor adoption progress and service delivery health.
- Coordinated communications and readiness activities for new operational governance processes, including job aids, FAQs, and end-user guidance documentation.
- Tracked risks, stakeholder concerns, and adoption barriers; recommended mitigation strategies to leadership and delivery teams.
- Collaborated with operations, finance, and technical teams to streamline workflows, improve vendor accountability, and reduce manual reconciliation efforts by 30%.
- Conducted root cause analysis and validated operational records to support audit, compliance, and adherence to internal controls and SLA requirements.
- Monitored incident management and service delivery through ServiceNow and Azure reporting tools, contributing to 99% on-time ticket resolution.

Tools: Power BI, Advanced Excel, SQL, Snowflake, ServiceNow, Azure Monitor, PowerPoint, Python, Jira

Vensiti Inc., Dallas, Texas

September 2024 – December 2024

Business Analyst

Client: Cigna Healthcare

- Created and maintained SOP documentation, operational workflows, and process flow diagrams supporting enterprise system implementation and governance initiatives within a large healthcare organization.
- Coordinated stakeholder meetings and tracked deliverables, risks, dependencies, and SLA timelines across multiple concurrent projects.

- Developed metrics reporting dashboards and executive presentations to provide leadership visibility into project health, operational performance, and vendor deliverables.
- Standardized reporting templates and consolidated project data from multiple business teams to improve consistency and reduce reporting inefficiencies.
- Supported audit preparation, documentation management, and compliance tracking for enterprise operational programs.
- Assisted with training logistics coordination and adoption support activities for new system processes and workflows.

Tools: Microsoft Project, Microsoft Planner, Power BI, Advanced Excel, PowerPoint, Azure DevOps, Microsoft Dynamics, Confluence, Excel (PowerPivot, VBA)

ZONTAL, Remote, Texas

August 2022 – August 2024

Business Analyst

- Led organizational change management activities across Product, Engineering, QA, and Client Success teams—managing end-to-end product lifecycle phases including requirement discovery, UAT coordination, production deployment, and post-go-live stabilization.
- Designed and implemented comprehensive Standard Operating Procedures (SOPs) for project governance, UAT execution, release management, defect handling, and stakeholder communication workflows—reducing implementation errors by 25%.
- Developed and executed stakeholder engagement plans and communications materials (presentations, job aids, FAQs, executive reports) to support organizational readiness for new SaaS product implementations.
- Coordinated training logistics, readiness reviews, and user adoption support activities for enterprise client transitions, including rollback planning and post-production hypercare frameworks.
- Created structured process flow documentation, swimlane diagrams, and business rule repositories in Confluence—standardizing product configuration guidelines and improving cross-team execution clarity.
- Tracked delivery milestones, risk registers, and cross-team dependencies using Monday.com dashboards—improving on-time release delivery by 20%.
- Developed executive-level KPI dashboards in Power BI providing visibility into sprint velocity, defect trends, release stability, and client adoption progress.
- Ensured compliance alignment with healthcare regulatory standards (GDPR, data governance) by validating access controls and documenting audit-ready processes.
- Mentored junior analysts on documentation standards, stakeholder communication best practices, and requirement traceability methods.

Tools: Jira, Confluence, Monday.com, Power BI, Agile / Scrum Methodology

CPR, Richardson, Texas

January 2023 – May 2023

Consultant

- Led business and technical analysis for a Virtual Customer Service Center (Chatbot) and Voice-to-Text application in an Agile/Scrum environment, supporting stakeholder adoption of new digital service channels.
- Partnered with cross-functional stakeholders including product managers, operations leads, and technical architects to define scope, user interaction flows, and conversational objectives aligned with business goals.
- Translated complex business requirements into structured documentation including UML diagrams, use case documentation, and business process flow models—improving stakeholder clarity and requirement alignment by 35%.
- Conducted gap analysis and user behavior research to identify inefficiencies in existing workflows; generated actionable recommendations that reduced chatbot abandonment rate by 30%.
- Delivered executive-level presentations summarizing performance metrics, engagement trends, and enhancement roadmaps to leadership teams.

Tools: RASA X, Python, NLP, UML, Lucidchart, Microsoft Visio, Agile, Jira, Confluence, Excel, PowerPoint

Darwinbox, Hyderabad, India

July 2020 – July 2021

Business Analyst

- Conducted structured stakeholder interviews and functional workshops to capture business requirements related to HR operations, leave management, payroll, and employee engagement workflows.
- Created comprehensive process flow diagrams, UML use cases, and system interaction models; maintained Requirements Traceability Matrices (RTM) across development, testing, and deployment phases.
- Supported UAT planning and coordination by reviewing test cases, validating coverage against requirements, and assisting with defect clarification during validation cycles.
- Managed centralized documentation repositories in SharePoint, enforcing version control, audit readiness, and structured knowledge management practices.
- Developed Tableau dashboards analyzing employee ticketing trends, leave utilization patterns, and HR service SLAs; conducted SWOT analysis to identify operational improvement opportunities.

Tools: Jira, Confluence, SharePoint, Tableau, SQL, Microsoft Visio, Lucidchart, Agile / Scrum, Excel, PowerPoint
